

Hydraulic Maintenance Sets

- versatile applicable
- various accessories
- packed in metal case
- completely ready to use
- equipped with quick couplers
- incl. hydraulic spreader
- hydraulic cylinder and spreader with spring return

These hydraulic sets are indispensable assistants in every workshop and plant. They give you sensitive hydraulic power for all universal jobs like:

- adjusting, lifting, removing of dents,
- pressing out of bolts, bending, moving,
- spreading, tensioning, etc.

The robust joints enables to combine every accessory very easy.

The hydraulic cylinder has the corresponding facility at the piston rod as well as on the cylinder bottom for fixing the extension tubes or the various attachments.
