History

pewag austria – a globally leading chain manufacturer with production facilities in Austria and in the Czech Republic can draw on a century of tradition and experience.

Today our success is built on technically mature quality products and comprehensive customer service. Our technical head start is assured by the application of modern technology and the pewag quality system (ISO 9001). In every country in the world our products and services guarantee safe and durable use. Our broad range of services covers lifting chains and accessories, lashing systems for load securing, textile lifting products, hoist chains, conveyor chains, DIY-products, forestry chains and tyre protection chains.

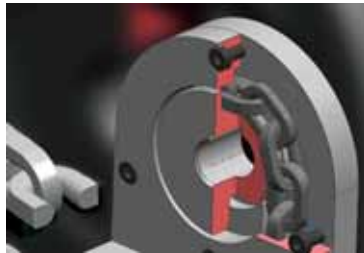

Product variety

A long chain at achievements for the employment within the industrial range.
